Summary

Software engineer with 7+ years (React/Next.js/TypeScript), experience in startups and high-quality product delivery. I work end-to-end (UI, integrations, tests, CI/CD and deployment) and I am fluent in English. Available to start immediately (CLT or contractor).

Highlights

- Full-stack MVPs in Next.js (App Router / React Server Components), from zero to deployment.
- Web scraping/data extraction in Python: 10M+ public records processed (normalization and deduplication).
- Maximum performance on landing pages (PageSpeed/Lighthouse 10/10) and Core Web Vitals.

Skills

React, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind, Vite | Micro-frontends (Module Federation), Nx, Design System, Storybook/Chromatic | GraphQL/REST, Node.js, PostgreSQL, Python | Jest, Cypress/Playwright | GitHub Actions, Docker, AWS Lambda/S3/CloudFront

Experience

Full-stack Consultant (Freelance / Contracts) | Global Projects

Feb 2024 - Present | Remote

- Delivered full-stack Next.js MVPs (App Router/RSC), owning architecture, UI, integrations and deployment.
- Micro-frontends with Module Federation in an e-commerce marketplace, reducing overall deployment time by ~35%.
- Design system in Storybook + Chromatic covering ~90% of UI patterns, reducing visual adjustments backlog.
- SaaS dashboard in Next.js + Tailwind + TanStack Query; GraphQL integrations and serverless APIs (AWS Lambda).

Fullstack Engineer | act digital

Jan 2023 - Feb 2024 | Remote / São Paulo

- Micro-frontend architecture with Nx Monorepo, reducing new project setup by ~50%.
- Shared design system in Storybook and CI/CD with GitHub Actions + Docker, enabling daily deployments.

Front-End Developer | GFT Technologies

Feb 2021 - Dec 2022 | Hybrid

- Migrated AngularJS -> React + TypeScript, reducing rework and simplifying releases.
- GraphQL/REST integrations and GitFlow/code review improvements, increasing quality and cadence.

Junior Front-End Developer | Jellyfish (ex-Reamp)

2018 - 2020 | Startup

- React + Material UI dashboard with real-time visualizations (Highcharts) and build improvements with Docker/Jenkins (~40%).

Development Intern | Mr. Crespim (Agency)

Nov 2016 - Nov 2017

- HTML/CSS landing pages and JavaScript script optimizations for marketing campaigns.

Education & Languages

Technologist in Internet Systems - Senac (2014 - 2016) | Portuguese: Native | English: Fluent
